

TW7. Technologies : the new potentials that can be exploited

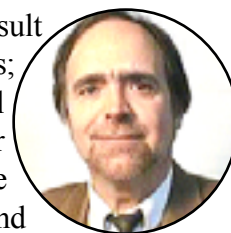

Mr. Grégoire ALADJIDI, investment director - Demeter Partners 3

Demeter Partners is a Paris-based investment capital firm certified by the Autorité des marchés financiers (stock market authority) since July 2005, owned by the management team. Demeter is mainly oriented toward expansion capital, working with companies as they grow in the following sectors : eco-industries (water, air and waste treatment, site remediation, etc.) and eco-energies (energy efficiency, renewable energies, etc.).

Mr. Gérard ANTONINI, scientific director - Record

RECORD, established in 1989 on an initiative from the French Minister for the Environment, is the result of a collaboration between industrialists wishing to group together their research needs and means; the French public authorities and scientists from almost all fields (physics, chemistry, mechanical engineering, etc.). The aims are to be a collaborative organization in which the members define their study or research programmes on hazardous waste and contaminated soils, to provide a scientific base for exchanges between industrialists, the Public authorities, and communities, to pool documents and organise information exchange, to seek out cooperation with equivalent organizations abroad in order to facilitate research on an international level.

Mr. Christophe BERNAD, chief executive officer - Neos

Neos is a private company specialized in the waste management equipment: conception and manufacturing of sorting centres and containers. Neos supplies turnkey projects.

Mrs. Claire DADOU WILLMANN, general delegate - 2ACR (Alliance Chime Recyclage)

Created in 2011, this association brings together industry professionals from chemistry and environmental services. The aims are to restructure an added-value recycling industry in France, to convert waste to raw materials, to create the conditions for a sustainable and profitable recycling industry and to develop the eco-design strategy. 2ACR counts 21 members such as Arkema or PlasticsEurope. 2ACR has an european vocation.

Mr. Pascal PESLERBE, development manager France - Veolia Environment

Veolia Environmental Services is a global operator specialized in efficient waste management solutions for public authorities and industrial companies. The commitment is based on achieving objectives, such as minimizing risk and reducing the consumption of resources by increasing the recovery of materials and energy from waste.

Mr. Benoit CHARPENTIER, Senior VP Investments Total Energy Ventures -TOTAL SA

A leading international oil and gas company and world-class petrochemical producer, Total is active across the oil and gas value chain, from discovery and production to processing and marketing. Total Energy Ventures investments supports the development of companies with innovative technologies and business models in areas such as alternative and renewable energies, efficient use of energy and natural resources, waste management and greenhouse gas reduction, etc. that will help meet the challenges of energy transition.
